

Solis-EPM-5G

Solis Export Power Manager

Smart & strong

- Simultaneous control of 20 X Solis inverters

Saving & high precision

- Simultaneously monitor the operating data of the 20 X Solis inverter, saving the cost of the monitoring system
- The control accuracy is up to 1%, which improves the system's spontaneous use rate

Friendly & compatible

- Supports simultaneous access of Solis inverters with different powers
- Monitor power generation and load consumption at all times

Solis-EPM-5G

Models	Solis-EPM1-5G	Solis-EPM3-5G-PRO																																																						
Input AC																																																								
Rated voltage	1/N/PE, 230 V	1/N/PE, 230 V; 3/(N)/PE, 400 V; 3/PE, 480 V																																																						
Input voltage range	100 ~ 300 V (L-N)	100 ~ 300 V (L-N); 175 ~ 519 V (L-L)																																																						
Input frequency range		45 ~ 65 Hz																																																						
Communication																																																								
Inverter communication		Modbus																																																						
Communication with inverter		RS485 (Wired)																																																						
Max. communication inverter numbers	20	20 (Recommended)																																																						
Monitoring		WiFi / 4G / LAN Stick (Optional)																																																						
General Data																																																								
Operating ambient temperature range		-25 ~ +60°C																																																						
Relative humidity		5% ~ 95%																																																						
Max. operation altitude		2000 m																																																						
Ingress protection		IP65																																																						
Pollution degree		PD2 (Inside), PD3 (Outside)																																																						
Overvoltage category		III																																																						
Self-consumption		< 6 W																																																						
Dimensions (W × H × D)		364 × 276 × 114 mm																																																						
Weight		2.7 kg (without CT, Meter)																																																						
AC connection		Quick connection terminal																																																						
Display		LCD																																																						
Smart meter	No	Split phase: AGF-AE-D ⁽¹⁾ Three phase: ADL3000-E-B ⁽²⁾																																																						
CT connection		Plug terminal																																																						
CT specification	Single phase: Standard (100 / 5 A or 300 / 5 A)	Split phase: Standard (200 / 40 mA) Three phase: Optional (Secondary current is 5 A)																																																						
Power control accuracy		1%Pn																																																						
Features																																																								
Failsafe function		Yes																																																						
Remote upgrade		Yes																																																						
CT specification

(1) For AGF-AE-D, 2 CTs(200/40mA) will be provided by default.

(2) For ADL3000-E-B, CTs should be ordered separately.

(3) Inverters may need a communication adapter to connect the EPM,
please consult a sales representative before placing an order.
